akkar story

Istanbul Facilities in 3 different location equipped with advanced technologies

It was the year 1989 when Akkar was first founded as a small manufacturing facility that entirely focused on producing shotguns in Istanbul. In 1992, Akkar produced Turkey's first pump action and gas operated semiautomatic shotguns with innovative collaboration and feedback of prominent gunsmiths and shooters. Since then, it has proven itself with its superior quality and service that enabled Akkar to gain such recognition and trust in the firearms market. Hence, Akkar is now proudly supplying the global arms market both civilian and law enforcement. Having been well established in

and calibers as Over and Under, Side by Side, Triple Barrel, Semi-Automatic and Pump Action. Akkar has been producing shotguns under following registered trademarks that are certified and guaranteed by Akkar Quality: Mammut®, Churchill®, Altay®, Karatay®, Maxi-Mag®, M-2000®, Armstrong®, Apache®, Komanchi®, Poseidon® and Polaris®. Additionally, as a reliable partner, Akkar has been successfully manufacturing accessories, parts and full bodied shotguns for world-famous brands and law enforcement organizations. As we extend 10 years

Akkar shotguns have been proudly produced and assembled in house in compliance with Advanced Turkish Standards TS870 IS as well as other known International Standards including but not limited to ISO9000:2015 and AS9100 Rev D.

the market, with its in-house experienced engineers, designers and gunsmiths, Akkar has the full capacity to design and manufacture all components of any shotguns in its high-tech equipment, development and production facility. From an initial idea to a finished product, CAD/CAM Systems are used at every stage of the work to satisfy specific market demands. Akkar has a wide product range that include well-balanced sporting, hunting and tactical shotguns. Under such categories, shotguns are produced in different gauges

warranty for workmanship of our shotguns, maximum quality production and service is our primary mission. Akkar Silah Sanayi Ltd. is accredited for the compliance of ISO-9001: 2015 and AS 9100 Rev D. standards.

We aim to keep progressing our quality and service standards and our team will proudly continue to have the honor of serving all precious customers with Akkar quality and guarantee for the years to come.

State of the Art

Around the time when Akkar decided to launch it's first classical yet innovative and elegant, superior quality break open shotgun collection, the brand name Churchill was offered by a friend and a long time acquaintance Paul Kassnar who then owned Kassnar International of London, the original registrar of the brand in UK.

The significance and weight this name bore was well observed and always carefully considered by Akkar team who enjoy tremendously designing and producing precision shotguns with the awareness that there is still is so much more to do.

NEW

OxyCAP is our newest heat treatment process rather than being a traditional coating technique where we succeeded hardness, corrosion, impact and abrasion resistance
Matte or Glossy finish with Slick Satin Look

- Achieving the desired light weight in field guns with actually STEEL RECEIVER which was quickly noticed by prominent figures in the sector.
- Akkar's dedication to make durable shotguns that could last for generations requires intolerant precision from selection of high-strength material for the construction to cladding, hardening and finishing processes.

Reliability

One thing that differentiates Akkar from its counterparts is Sourcing and Consistency of quality materials used which creates the nuance all shooters look for.

In Akkar facilities, state of the art manufacturing technologies on high-end CNC machines ensure minimal tolerances thus providing performance and reliability sought after.

206 Series

Over & Under

206 Series was Akkar's first break open shotgun collection launched in 2005 with rather classical look and ergonomic features. Churchill shotguns proudly follows The Sporting Arms and Ammunition Manufacturers' Institute (SAAMI) standards and also tested and recognized by CIP (International Proof Commission) standards for being compatible with steel shots as environmental awareness is rapidly rising against lead pellets polluting the nature.

mammut 300 Series

Triple Barrel

Being from a long tradition of Gunsmiths in re-known region of Mediterranean Taurus mountains in Central Anatolia, the mothership Akkar, with it's captain (Mr. Akdal) and crew on board relentlessly sail around the globe on its course where nothing is compromised for its goal of consistency and quality in efforts of perfecting the objects of desire. Mammut triple barrel shotguns are designed to give one the pleasure and privilege when talking about and showing off its details. By designing Mammut 300 series the bar was critically raised for what men can really do.
